

### **GTC-350**

MACHINE WEIGHTS	
<b>STANDARD CRANE</b> with 3 section- 27.2 m boom, 5,670 kg counterweight, Main winch with wire rope, and 750 mm 3-bar semi grouser track shoes	31,802 kg
OPTIONAL EQUIPMENT	
Extendable jib - 7.2 m to 12.8 m (Offset Angles 5°, 25° & 45°)	630 kg
Auxiliary Nose Sheave	44 kg
Auxiliary Winch with 91.4 m wire rope	521 kg
35 t hook block - four sheaves	420 kg
4 t overhaul ball	113 kg

GTC-350-1-E-19-1-01-83-571-A Printed in Japan **TELESCOPIC BOOM CRAWLER CRANE** 

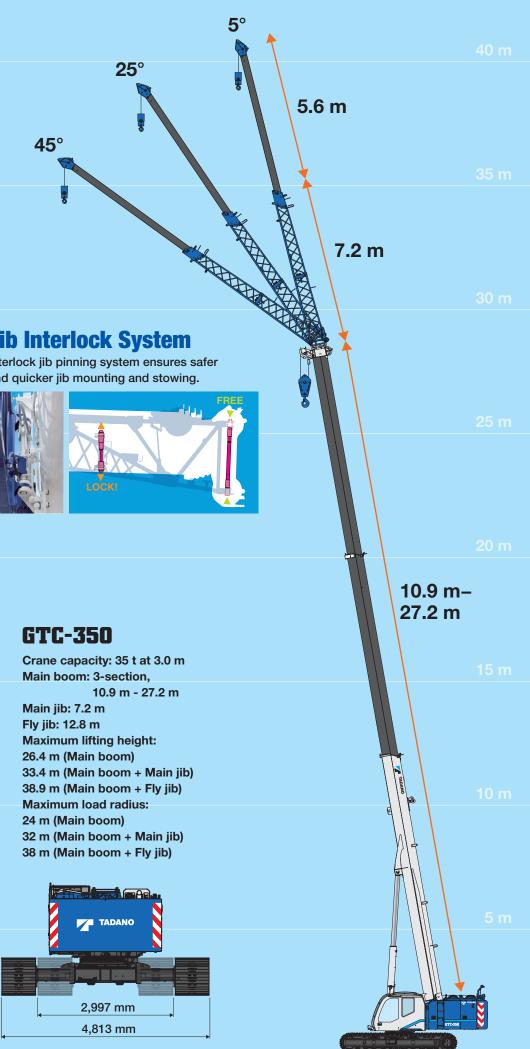

# **MULTI PURPOSE CRANES: LIFTING AND FOUNDATION WORK**

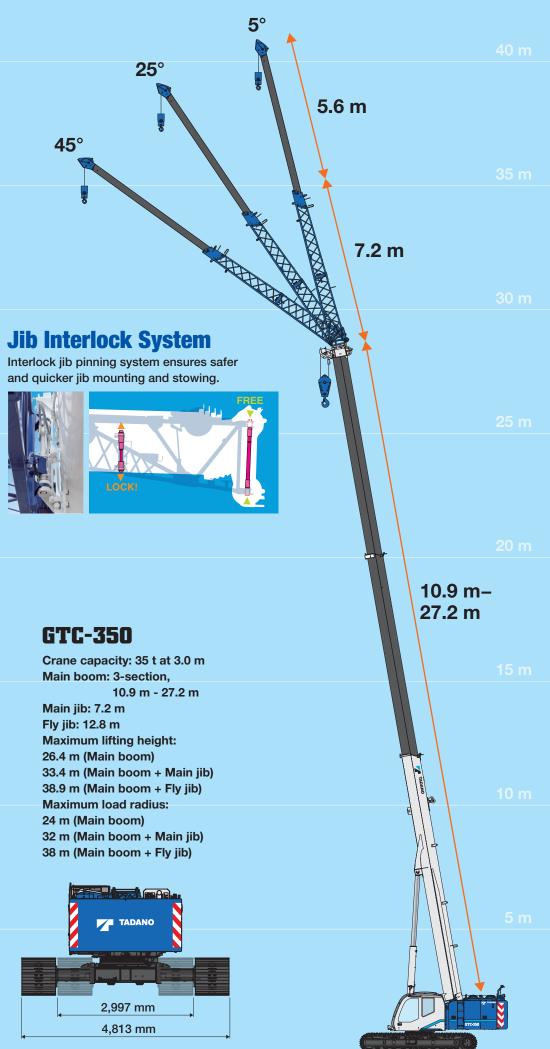

Most practical granes for your job site

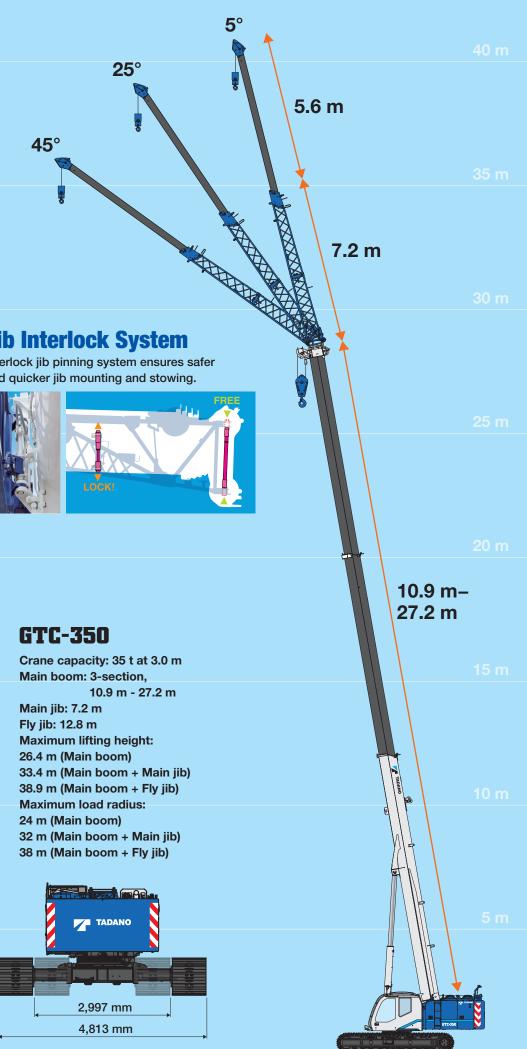

**TELESCOPIC BOOM CRAWLER CRANE GTC-350** 

**Grane canacity** 

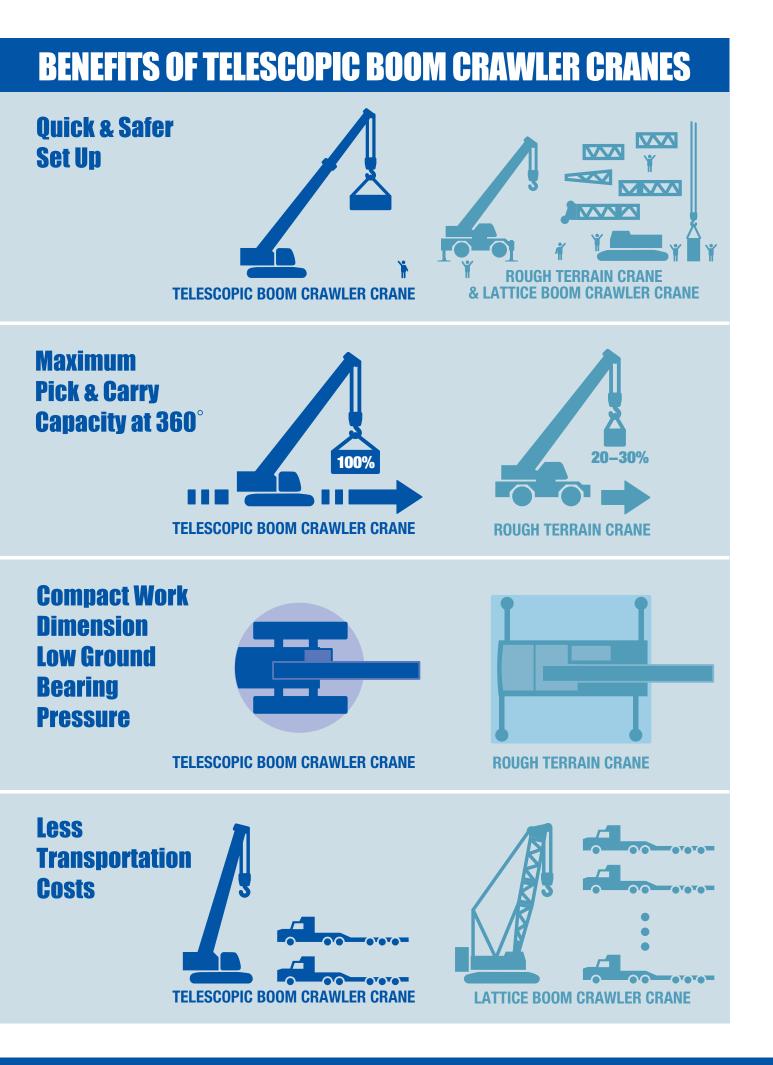

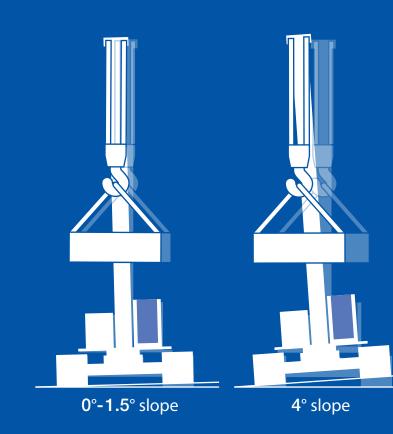

01 | GTC-350

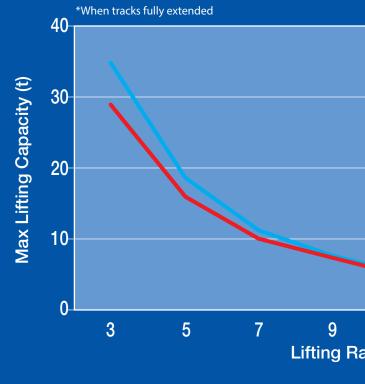

# **GENUINE PICK & CARRY DESIGN**

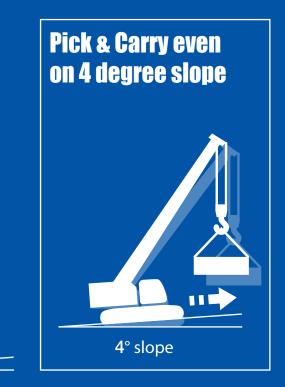

Level ground load charts available up to 1.5° slope! Load chart at 4° slope is top in class!

**Even at 4° slope the GTC maintains 83% of level ground capacity!** 

	O°-1.5° slope 4° slope				
12 adius (m)	16	20	24		

# **PRODUCT CONCEPTS** w **Features**

# **Retains all of the beneficial** features of the GTC Series

- Pick & Carry the load on uneven and rough terrain through 360 degrees slew conditions
- Pick & Carry the load with track retracted position
- Telescope under full load lifting capacity
- Automatic switching load charts for operation up to 4 degrees out of level
- Use of foundation attachments such as vibratory hammer\*

\*TADANO MANTIS Guidelines for vibratory hammer use must be followed.

# **Tough & Durable Design**

Simple control system. Class exceeding larger boom sections and boom head, stronger telescopic cylinder.

# Duality

The GTC series utilizes superior designs from Tadano's global engineering team incorporating proven components from Tadano Japan, such as jibs, winches, and cylinders to achieve improved quality. performance, and reliability.

## Long Boom and **Enhanced Lifting Capacity**

The GTC booms are purpose designed and manufactured for telescopic boom crawlers by Tadano Japan.

# Full power boom system

Robust double acting hydraulic cylinder allows telescoping of all rated loads.

### **Powerful winch**

Grooved drums, cable followers and 3rd wrap shutdown are standard.

## Carbody frame

Purpose design rugged carbody frame with strong track extension cylinders.

## High power engine provides superior travel and multi-function performance

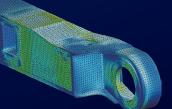

Powerful engine, pump and track drive motor. Crane Engine: 4-cylinder Cummins QSB 4.5 Tier3, Euromot stage IIIA

- (123kW at 2,000 rpm, max. torque 624 Nm at 1,500 rpm)
- Tier4f, Euromot stage IV
- (129kW at 2,200 rpm, max. torque 705 Nm at 1,500 rpm)

#### Track frame

Purpose design track frame design incorporating full use of FEM analysis ensuring high strength and durability.

GTC-350 | 06

# **PRODUCT FEATURES**

### Load Moment Indicator [AML-C]

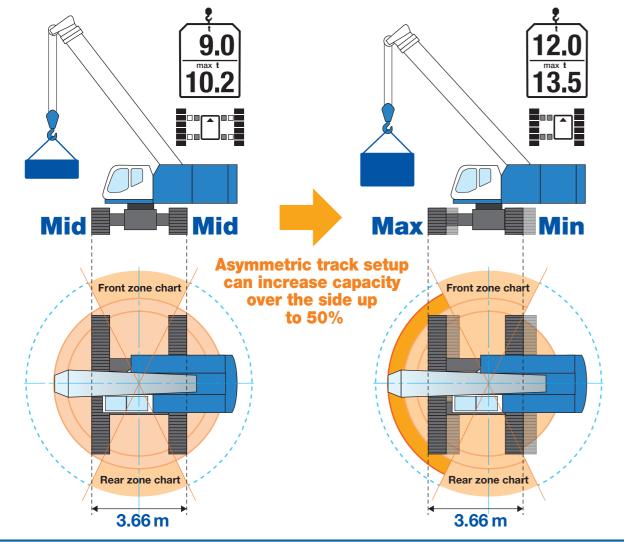

AML-C allows the operator to simultaneously monitor: boom angle, boom length, crane inclination angle, track extension width, counterweight configuration, rated lifting capacity and hook load. While traveling under load, the crane inclination can be displayed and the AML-C provides the corresponding rated lifting based on actual inclination.

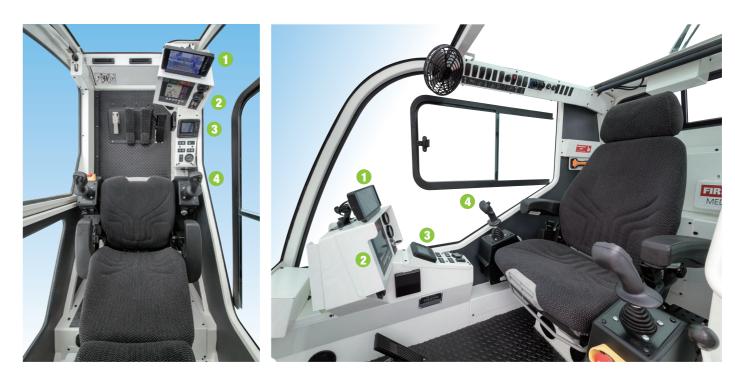

The operator configurable work range limit function warns the operator and provides function soft stop when the crane approaches the pre-registered boom angle (upper limit, lower limit), lifting height, load radius and swing angle.

# OPTI- OPTIMUM lifting performance WIDTH at any track WIDTH!

Optimized lifting performance for reduced width configurations. Reduced width, asymmetric track setup can give significant capacity improvements when compared to symmetrical track width settings.

### Winch, Rear and Side View Color Monitor 1

#### **Load Moment Indicator** [AML-C] **(2)**

Winch page, monitor display

**Maintenance Reminder** 

Function **3** 

Operator can preset the maintenance reminder function on the control screen by selecting the required maintenance items and engine hours from 50 hours up to 2,000 hours.

### **Compact design**

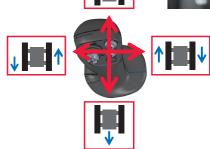

Maximize productivity on a confined job site. The GTC-350 excels in areas with low overhead clearance, challenging access, or tight working conditions.

### Travel Mode 🕗

Select travel mode by either using the touch screen or pushing a button on the control screen, right joystick acts as a travel controller for improved operability.

# **Optional attachments for GTC Series**

# **Telematics with HELLO-NET System**

HELLO-NET System is an Internet-based crane management system capable of simultaneously monitoring crane location and operating conditions. Service areas differ according to individual countries.

### Monitoring machine information from your computer

#### 1. Work History

HELLO-NET Owner's Site displays the day-to-day operational status, mileage and remaining fuel for each machine equipped with a communication terminal. In addition, you can view a list displaying the number of hours of operation and the mileage of all your machines for any specified month.

#### 2. Machine Position Data

Using HELLO-NET Owner's Site, you can check a machine's latest position (up until the previous day) on a map. Two types of position data are transmitted automatically from your machine once a day. Work Site: The location where the machine engine has been activated (for one hour or more). Position at Day's End: The final location data from the GPS which was received on a given day.

#### 3. Maintenance Information

You can check the maintenance timetable of your machines for periodical replacement parts and inspection schedule.

HELLO-NET supports the maintenance of your machine.

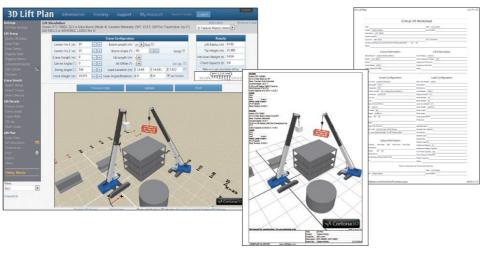

Telematics (machine data logging and monitoring system) with HELLO-NET via internet (\*availability depends on countries). Details: The availability of data communications systems, such as satellite or mobile communications differ according to individual countries. There are some countries where the system itself is not in use. For details, please contact your distributor or our sales staff.

## **3D Lift Plan**\*

Customize 3D lift simulation at your fingertips for FREE\*\*. Easy access and user friendly webpage allows you to calculate crane configurations and ground bearing pressure simultaneously. Moreover, you can print out detailed configurations and 3D graphics to further support your work preparation.

\*3D Lift Plan is a product of A1A Software LLC. \*\*Advanced customize functions will be extra.

## **Complete Auger Package**

Includes circuit, hoses, fasteners, stowage bracket, two-speed auger motor and 2 pieces of kelly bar.

## **Work Platform**

Work Platform can be fitted to the boom head or first section of boom extension. Heavy duty all steel construction with non-skid floor, Self-leveling platform with position locking pin, Tool storage racks and interior handrails inside. By selecting Work Platform Chart, permissible operating range will be monitored by the load moment indicator. It also comes with DC hydraulic pump integrated into the crane system to lower and retract the boom with Work Platform to the ground in the event of main hydraulic system failure.

### **Clip on Polyurethane Flat Pads**

3-bar semi grouser shoe

Clip on polyurethane flat pads can be easily installed/removed on top of the standard 3-bar semi grouser shoes.

• Size: 914 mm x 1,828 mm Maximum load capacity: 340 kg

## **Hydraulic Tool Circuit**

Provides 23 L/min and 45 L/min at 176 bar through a 15.2 m twin hose reel with quick disconnect fittings.

# **WORK APPLICATIONS**

Note: "Work platform option only available in approved markets. Please contact your Tadano representative to confirm availability."
