

Effective rear loader for cost-effective milling operations.

Cold Milling Machine

W 100 R | W 100 Ri | W 120 R | W 120 Ri

The effective rear loader for cost-effective milling operations

The high-performance cold milling machine in the one-meter class is designed for cost-effective milling operations at working widths of 1.0 m or 1.2 m.

The machine covers a wide range of applications, from milling surface layers to complete pavement removal.

The machine can be equipped with a large number of different milling drums, increasing flexibility and machine utilization.

The LEVEL PRO **PLUS** leveling system fully integrated into the machine control system guarantees high-precision milling results.

The high-performance rear loading system can be flexibly adjusted for optimum loading of the milled material.

Highlights of the Cold Milling Machine at a Glance

1 |

HIGH-PRECISION, INTUITIVE LEVELING WITH LEVEL PRO *PLUS*

- > Simple, intuitive operation
- > Fully integrated into the machine control system
- > Numerous new additional and automatic functions
- > Milling depth measurement via displacement sensors installed in the hydraulic side plate cylinders
- > Ultrasonic sensor in the extendable leveling boom on the left side of the machine

2 |

EFFICIENT MULTIFUNCTIONAL ARMREST

- > Ergonomically designed multifunctional armrest with color control screen
- > Job data displayed on the control screen
- > User-programmable favorites buttons

3 |

PERFECT VIEW OF IMPORTANT WORKING AREAS

- > Unobstructed view of the right side plate
- > Excellent visibility to the rear
- > High-quality camera / monitor system for viewing important working areas

4 |

OUTSTANDING ERGONOMICS AND EASE OF OPERATION

- > Ergonomically designed comfort operator's seat including seat heater
- > Electrical filling level indicator for the water tank
- > Convenient access with "welcome and go home" lighting
- > Operator's platform features wind and weather protection elements

5 |

QUICK AND PRECISE MANEUVERING

- > Up to 7.5 km / h travel speed
- > Ability to reverse with milling drum engaged
- > Fast, precise height adjustment
- > Memory function for height adjustment
- > Electronically controlled travel drive for high-precision milling

6 |

MANEUVERABLE AND COMPACT MACHINE

- > Front wheels have a large steering angle for small turning radii
- > Fast steering using the steering wheel
- > High-precision steering via joystick in multifunctional armrest
- > Compact machine dimensions

8 |

9 |

HIGH EFFICIENCY FOR TREMENDOUS PRODUCTIVITY

- > Variable additional weights up to 400 kg
- > Automatic WIDRIVE functions significantly reduce operator intervention, allowing for one-person operation
- > Automatic positioning function with relief sensors
- > Hydraulically switching power belt tensioner
- > State-of-the-art WITOS FleetView telematics system for efficient operations
- > Optimized serviceability

10 |

LOW ENVIRONMENTAL EMISSIONS

- > Engine models for EU Stage 3a / US EPA Tier 3 or for stringent EU Stage 5 / US EPA Tier 4f emissions standards
- > Standard diesel particulate filter for EU Stage 5 / US EPA Tier 4f
- > Three different milling drum speeds
- > Optimized sound and heat insulation
- > Speed-controlled cooling fan drive

7 |

MAXIMUM FUNCTIONALITY WHEN MILLING

- > Comes standard with extremely wear-resistant HT22 toolholder system
- > Hydraulic pick ejector for fast pick changes
- > Hydraulically lifting side plates with proactive floating position to automatically lift on loose ground
- > Scraper lifted automatically via overload sensor
- > Water spray quantity electrically adjustable from the operator's platform

8 |

FLEXIBLE, HIGH-PERFORMANCE LOADING

- > Hydraulic folding conveyor for quick folding during operation on site
- > Wide conveyor swing angles
- > Quick-release coupling for easy mounting and demounting of the discharge conveyor

Operating Highlights

EVERYTHING UNDER CONTROL

With the W 100 R / W 100 Ri / W 120 R / W 120 Ri milling machine, you have complete control - clearly and ergonomically arranged control instruments. A clear view of critical work areas. Intelligent assistance systems to reduce your workload. An ideally designed dialog between human and machine - easy operation and outstanding performance in perfect harmony.

High-Precision, Intuitive Leveling with **LEVEL PRO PLUS**

When milling, it's important to remove the layers of asphalt at the specified depth. WIRTGEN's intuitive **LEVEL PRO PLUS** leveling technology can be relied on to precisely maintain the specified milling depth.

SIMPLE, INTUITIVE OPERATION

The **LEVEL PRO PLUS** leveling system developed especially for cold milling machines offers easy and intuitive one-hand operation using the rotary knob, and the menu can be configured as desired. **LEVEL PRO PLUS** stands out due to its precise milling results.

FULLY INTEGRATED

The **LEVEL PRO PLUS** leveling system is fully integrated into the machine control system, enabling a high degree of automation.

ADDITIONAL AND AUTOMATIC FUNCTIONS

The **LEVEL PRO PLUS** leveling system offers many automatic and additional functions that make the operator's job easier. This also speeds up work processes.

DISPLACEMENT SENSORS

The reference line is scanned via heavy-duty displacement sensors built into the hydraulic side plate cylinders and displayed directly on the high-resolution **LEVEL PRO PLUS** control screen.

LEVELING BOOM

The telescoping leveling boom with an ultrasonic sensor for scanning references located up to 2.0 m to the left of the machine guarantees perfect milling results, even when performing complex leveling jobs.

1 |

1 | **LEVEL PRO PLUS** is synonymous with perfect leveling quality at high operating speeds.

2 | The leveling system uses a variety of different sensors.

3 | Easy operation guarantees an efficient leveling process.

Efficient Multifunctional Armrest

The W 100 R / W 100 Ri / W 120 R / W 120 Ri is equipped with an efficient multifunctional armrest that not only speeds up processes and improves results, but also results in a more satisfied operator.

ERGONOMICALLY DESIGNED MULTIFUNCTIONAL ARMREST

The multifunctional, individually adjustable armrest combines innovative design with perfect user-friendliness. Important information is displayed in color on the control screen. The multifunctional armrest is also precisely integrated into the universal operating concept for the entire WIRTGEN small milling fleet, and it enables productive working from the outset.

1 | The operator has everything under control with just one hand.

JOB DATA

Information like the weight and volume of the milled material, the size of milled areas, or the number of loaded trucks can be displayed automatically. This job data can be used to log daily performance.

FAVORITES BUTTONS

Four buttons can be programmed with twenty different functions as required by the operator.

1 |

2 | The ergonomically designed operator's platform with multifunctional armrest significantly increases the machine's productivity.

Perfect View of Important Working Areas

1 | *The camera's ability to see and display key work areas enhances performance and quality.*

2 | *The operator always has an unobstructed view of the right side plate.*

Excellent visibility quickly pays off. The well-designed visibility concept of the W 100 R / W 100 Ri / W 120 R / W 120 Ri significantly reduces the operator's workload, resulting in better milling results.

UNOBSTRUCTED VIEW OF THE RIGHT SIDE PLATE

The optimized shape of the operator's platform offers an unobstructed view of the

right side plate and in front of the milled surface.

EXCELLENT VISIBILITY TO THE REAR

The compact design of the discharge conveyor's suspension system ensures that the operator has a clear view of the milled surface behind the machine.

HIGH-QUALITY CAMERA / MONITOR SYSTEM

The camera / monitor system consists of two cameras and a heavy-duty monitor. The monitor provides a high-resolution view of the loading situation from the cameras at the end of the discharge conveyor and of the area in front of the milling drum housing below the machine.

Outstanding Ergonomics and Ease of Operation

A wide variety of different equipment features, individual adjustment options, and features that make operating the machine easier significantly enhance operator comfort. The result is maximum productivity on site.

COMFORT OPERATOR'S SEAT

The ergonomically designed operator's seat with seat heating, which rotates to the right and left, ensures that the operator has outstanding visibility to the side and to the rear.

ELECTRICAL WATER FILLING LEVEL INDICATOR

The operator can conveniently check the level of the water tank via the control screen.

"WELCOME" AND "GO HOME" LIGHTING

The access ladder and operator's platform can be brightly illuminated when approaching and walking away from the machine.

WEATHER PROTECTION

Additional wind and weather protection elements on the operator's platform protect the operator from exposure to rain and wind.

1 | The machine's high comfort standards enable fatigue-free, productive working.

Driving and Steering Highlights

ON THE ROAD TO SUCCESS WITH AN INTELLIGENT MACHINE

Narrow areas, problematic ground, immovable road installations. With the W 100 R / W 100 Ri / W 120 R / W 120 Ri, these challenges can be mastered effortlessly and without delay. Equipped with tried-and-tested, intelligent features, like extreme maneuverability and an electronically controlled travel drive, to ensure that you always rapidly achieve your objective. In short - every milling job is completed quickly.

Quick and Precise Maneuvering

Driving and steering innovations increase efficiency during day-to-day job site operations. The small milling machine is compact and maneuverable, allowing it to be moved quickly from site to site.

MAXIMUM SPEED OF 7.5 KM / H

The machine's travel speed of up to 7.5 km / h helps complete jobs particularly quickly.

ABILITY TO REVERSE WITH MILLING DRUM ENGAGED

The ability to reverse with the milling drum engaged makes it possible to maneuver quickly and easily on the job site.

RAPID HEIGHT ADJUSTMENT

The electrohydraulic height adjustment system allows the operator to set the milling depth quickly and precisely.

MEMORY FUNCTION FOR HEIGHT ADJUSTMENT

For fast, convenient height adjustment, it's possible to save up to three different height positions per machine side to memory buttons on the multifunctional armrest.

ELECTRONICALLY CONTROLLED TRAVEL DRIVE

The electronically controlled travel drive with two transport speeds and two milling speeds makes fine maneuvering possible when very precise milling is required.

1 | The small milling machine excels at fast maneuvering on narrow job sites.

2 | When pivoted in, the right rear wheel makes precise milling along obstacles such as curbs and walls possible.

3 | The electronically controlled travel drive makes high-precision milling possible - such as around road installations, for example.

Maneuverable and Compact Machine

The W 100 R / W 100 Ri / W 120 R / W 120 Ri small milling machine is an expert in tight curves and urban environments, making small turning radii and precise milling possible in any job site situation.

LARGE STEERING ANGLES

The large steering angles to the left and right guarantee small turning radii and thus rapid maneuvering, even in tight spaces.

FAST STEERING

In situations where the operator needs to steer particularly fast, the machine can be steered as always using the steering wheel.

PRECISION STEERING

The highly responsive hydraulic steering system allows the operator to steer the machine precisely and smoothly, including via the right-hand multifunctional armrest.

COMPACT MACHINE DIMENSIONS

Thanks to its compact design, the small milling machine can mill in confined spaces and is easy to transport.

1 | The machine's impressive steering angles make operations on narrow job sites easier.

2 | Compact machine dimensions make loading and transport easier.

Milling and Loading

Highlights

SOPHISTICATED CUTTING TECHNOLOGY

The milling drum unit features perfectly compatible components, manufactured from high-quality materials with optimized functionality and design. For perfectly level milled surfaces, long tool life, and unparalleled machine productivity in combination with the high-performance loading of the W 100 R / W 100 Ri / W 120 R / W 120 Ri rear loader. In other words: designed for success.

Maximum Functionality when Milling

Intelligent solutions for the milling drum, side plate, and scraper make milling faster and increase its quality overall.

HT22 TOOLHOLDER SYSTEM

The extremely wear-resistant **HT22** toolholder system (standard) minimizes downtimes and increases the service life of the entire milling drum.

HYDRAULIC PICK EJECTOR

The hydraulically operated pick ejector makes it easier for the operator to change picks.

HYDRAULICALLY RAISABLE SIDE PLATE

Overload sensors on the left and right side plates cause them to lift briefly to prevent them from sinking into soft ground.

AUTOMATIC SCRAPER LIFTING

Overload sensors protect the milling drum unit from damage by triggering the scraper to lift briefly, such as to avoid obstacles or uneven ground.

ELECTRICALLY ADJUSTABLE WATER SPRAY QUANTITY

The water spray quantity can be adjusted from the operator's platform to reliably cool the picks, bind dust, and ensure that the machine remains productive for extended periods of time.

A VARIETY OF MILLING DRUMS

A large number of different original WIRTGEN milling drums and special milling drums are available for a wide range of applications.

HT22 TOOLHOLDER SYSTEM IN DETAIL

- 1 | Innovative centering marks on the tool contact surface in combination with GENERATION X² picks for maximum toolholder service life right from the start
- 2 | Significantly larger, more durable, and self-centering contact surfaces on the top and bottom parts significantly extend the service life of the milling drum
- 3 | Increased wear volume in the shoulder section improves protection of the toolholder base when milling abrasive materials
- 4 | Reduced maintenance requirements due to longer intervals between torque inspections of the quick-change toolholder bolts (every 500 hours)
- 5 | Optimized shaft geometry with additional improved thermal processing to withstand extreme stress
- 6 | Protective plug prevents bolt head from getting dirty
- 7 | Heavy-duty retaining bolt
- 8 | Seal between top and bottom part allows top part to be easily removed / inserted
- 9 | Bottom part covers top part completely for maximum protection
- 10 | Extra-large contact surface between top part and bottom part for longer bottom part service life
- 11 | Optimized welded joint with increased strength and flexibility for optimum pick rotation

1 | The electrohydraulically operated pick ejector increases the productivity of the entire machine.

2 | The side plates can be raised hydraulically on both sides.

Flexible, High-Performance Loading

A cold milling machine is only as good as its loading system. That's why the W 100 R / W 100 Ri / W 120 R / W 120 Ri features a milled material loading system that was designed for maximum performance.

HYDRAULIC FOLDING CONVEYOR

The hydraulic folding conveyor can be folded away quickly for easy transport and to adapt to site conditions.

WIDE CONVEYOR SWING ANGLES

Wide conveyor swing angles of 25° to both the right and left make it possible to easily load material, even in difficult job site situations.

QUICK-RELEASE COUPLING

The innovative quick-release coupling ensures that the hydraulic connections can be easily connected when mounting / removing the discharge conveyor.

LARGE BELT WIDTH AND CLEAT HEIGHT

A large belt width and cleat height guarantee a high conveying capacity.

1 | The small milling machine features high-performance, efficient loading of the milled material.

2 | The quick-release coupling speeds up the process of mounting and removing the discharge conveyor.

3 | The folding conveyor reduces the machine's transport length.

A white and grey Wirtgen W 100 R milling machine is shown from a front-three-quarter view, parked on a newly milled asphalt surface. The machine features a large front grille with the Wirtgen logo, a side-mounted exhaust pipe, and a rear-mounted hopper. In the background, a yellow dump truck is parked near a pile of material covered with a green tarp. The scene is set against a backdrop of green hills and trees under a clear blue sky.

Performance and Productivity Highlights

MAXIMUM POWER IN A COMPACT DESIGN

Outstanding milling performance in a variety of applications. For numerous small contract sections and delicate milling tasks. Completed quickly and effortlessly in a cost-effective and environmentally friendly manner. With intelligent, tried-and-tested solutions on board. The WIRTGEN W 100 R / W 100 Ri / W 120 R / W 120 Ri small milling machine - for a more dynamic pace on the job site.

High Efficiency for Tremendous Productivity

The high-performance cold milling machine in the 1.0 m class stands out due to its wide range of applications. Its productivity is enhanced further by features tailored to site requirements.

ADDITIONAL WEIGHTS

Variable additional weights up to a total of 400 kg make it possible to achieve a high operating weight, excellent traction, and trouble-free transport.

REDUCED OPERATOR WORKLOAD

The WIDRIVE machine control system, which reduces the operator's workload and enhances performance, is used to control the engine speed, travel speed, and activation and deactivation of the water system, among other functions.

1 | Additional weights ensure that the machine has excellent traction in any application.

2 | Excellent access to components makes servicing the machine easy.

AUTOMATIC POSITIONING FUNCTION

The built-in, innovative automatic positioning function considerably simplifies machine operation through the use of relief sensors.

HYDRAULIC POWER BELT TENSIONER

The automatically engaging hydraulic power belt tensioner ensures that power is transmitted safely and effectively.

WITOS FLEETVIEW TELEMATICS SYSTEM

WIRTGEN's efficient WITOS FleetView telematics system supports fleet management, position and status monitoring, as well as maintenance and diagnostic processes.

OPTIMIZED SERVICEABILITY

Outstanding access to all maintenance and inspection points minimizes maintenance requirements.

Low Environmental Emissions

1 | Under high load, the engine control system increases torque to ensure that milling performance remains high.

2 | The W 100 R / W 120 R is equipped with a diesel engine that features powerful, economical engine technology.

3 | The W 100 Ri / W 120 Ri is equipped with a diesel engine that also features effective exhaust gas purification.

Low diesel consumption and low noise levels are better for both the operator and the environment. Ultimately, the small milling machine's environmentally friendly technology cuts costs and increases the operator's performance.

TWO ENGINE MODELS

The engine technology used in the W 100 R and the W 120 R meets EU Stage 3a / US EPA Tier 3 emissions standards. The W 100 Ri and W 120 Ri meet the stringent requirements of the EU Stage 5 / US EPA Tier 4f.

STANDARD DIESEL PARTICULATE FILTER

The diesel particulate filter that comes standard with the engine technology in the W 100 Ri and W 120 Ri meets even more stringent emission standards.

THREE DIFFERENT MILLING DRUM SPEEDS

Three different milling drum speeds make it possible to achieve unparalleled milling performance in a wide range of applications.

OPTIMIZED SOUND AND HEAT INSULATION

The effectively optimized sound and heat insulation significantly reduces noise emissions.

SPEED-CONTROLLED COOLING FAN DRIVE

The cooling system with temperature-controlled fan speed ensures noise emissions are kept to an absolute minimum.

Milling Drums				
FCS milling drum FB1000 HT22 LA15 with 100 picks	<input type="checkbox"/>	—	<input type="checkbox"/>	—
FCS milling drum FB1000 HT22 LA18 with 84 picks	<input type="checkbox"/>	—	<input type="checkbox"/>	—
FCS milling drum FB1000 HT22 LA8 with 148 picks	<input type="checkbox"/>	—	<input type="checkbox"/>	—
FCS milling drum FB1000 HT5 LA6X2 with 340 picks	<input type="checkbox"/>	—	<input type="checkbox"/>	—
FCS milling drum FB1200 HT22 LA18 with 101 picks	—	<input type="checkbox"/>	—	<input type="checkbox"/>
FCS milling drum FB1200 HT22 LA8 with 173 picks	—	<input type="checkbox"/>	—	<input type="checkbox"/>
FCS milling drum FB1200 HT5 LA6X2 with 408 picks	—	<input type="checkbox"/>	—	<input type="checkbox"/>
Milling drum FB600 HT22 LA15 with 72 picks	—	—	<input type="checkbox"/>	—
Milling drum FB80 HT02 FT250 with 30 picks	—	—	<input type="checkbox"/>	—
FCS milling unit FB400 HT22 LA15 with 61 picks	—	—	<input type="checkbox"/>	—
FCS milling unit FB500 HT22 LA15	—	—	<input type="checkbox"/>	—
Loading of the Milled Material				
Machine with hydraulic pre-fitting for a discharge conveyor - quick-change coupling	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Discharge conveyor 7,350 mm long, 500 mm wide, with hydraulic folding device	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Discharge conveyor 6,500 mm long, 500 mm wide, with hydraulic folding device	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Machine with belt device without discharge conveyor (FB600)	—	—	<input type="checkbox"/>	—
Machine with belt device without discharge conveyor (FB1000)	<input type="checkbox"/>	—	<input type="checkbox"/>	—
Machine with belt device without discharge conveyor (FB1200)	—	<input type="checkbox"/>	—	<input type="checkbox"/>
Hydraulic connection adapter screw coupling for additional discharge conveyor	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Hydraulic connection adapter quick-change coupling for additional discharge conveyor	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Machine Control and Leveling System				
LEVEL PRO PLUS leveling system right and left	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
RAPID SLOPE sensor for LEVEL PRO PLUS leveling system	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Leveling boom including sensor for LEVEL PRO PLUS leveling system	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Job data acquisition in the control display	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Operator's Platform				
Comfort operator's seat incl. seat heating	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Operator's platform with weather canopy and lateral weather protection elements (FB1000)	<input type="checkbox"/>	—	<input type="checkbox"/>	—
Operator's platform with a canopy, manually adjustable in height (FB1000)	<input type="checkbox"/>	—	—	—
Operator's platform with weather canopy and lateral weather protection elements (FB1200)	—	<input type="checkbox"/>	—	<input type="checkbox"/>
Operator's platform with a canopy, manually adjustable in height (FB1200)	—	<input type="checkbox"/>	—	—
Track Unit and Height Adjustment				
Front axle for working with a FB600	—	—	<input type="checkbox"/>	—
Increased traveling speed (up to 7.5 km / h)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Precision steering by pushbuttons (FB1000 / 1200)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	—
Precision steering by pushbuttons (FB600)	—	—	<input type="checkbox"/>	—
Miscellaneous				
Standard film coating in RAL 9001 (cream)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Film coating according to the customer's wishes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Model without WITOS FleetView	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
High-power lighting system LED including rotating beacon	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Additional weight 400 kg for four-wheel machine, removable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Milling drum assembly trolley to FB1300	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Assembly aid for the milling drum change	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Electrical fuel filter preheating	—	—	<input type="checkbox"/>	<input type="checkbox"/>
Hydraulically driven water filler pump	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Hydraulic pick ejector	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Monitor system with 2 cameras and screen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
License plate holder with LED lighting	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
